

PUBLIC ROOF

General information about the project:

Date:

Company:

Contact person: Telephone:

Street: Mobile:

Postcode / Town: E-mail:

Project Name:

Street:

Postcode / Town: Optigrün Object No.:

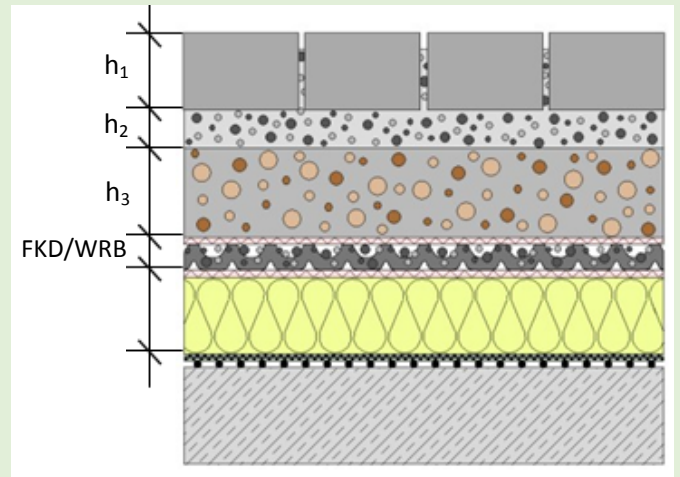

Technical details of the project:

Maximum permissible permanent surface load: kg/m² on support structure

Maximum possible installation height: mm (on waterproofing/inverted roof)

Roof pitch: % (on waterproofing/inverted roof)

- Walkable
 - private use (usually low intensity of use)
 - public use (usually high intensity of use)
- Car traffic up to 3.5 t
 - occasionally (3-4 times a week)
 - regularly (with approx. times a week)
- Truck traffic up to t
 - occasionally (3-4 times a week)
 - regularly (with approx. times a week)

AWTF.007 - CHECKLISTE VERKEHRSDACH STAND 21.02.2019

Paving/ top layer (h1): mm

Paving and slab dimension: X mm

Material:

Bedding material (h2): mm

Material:

Base layer (h3): mm

Material:

Drainage board (FKD/WRB) mm

Insulation (for inverted roof): mm

Material:

Insulation (compressive strength): kN/m² = kPa

Other
information:

I would like an object-related, personal consultation with your area manager.

Note:

We also require the following planning documents relating to the building in order to process your application quickly and efficiently:

1. Top view with marking of the different load limits within a total roof area
2. Top view with marking of a possibly given fire brigade access road and deployment areas for the fire brigade
3. Top view with positioning of the roof drains and associated roof slopes
4. Building sections, if helpful or necessary for understanding

Detailed planning documents are essential for a binding execution planning.

Please send the necessary data in digital form (if possible dwg or vwx) together with the completed checklist to the following e-mail address:
